

The GrGen.NET ToDo-List

Frontend (Java):

ToDo:

- Annotations of anonymous nodes and edges do not work.
- In replace/modify-part `typeof` does not work.
- Error detection for the `return` statement is errornous.
- If the filename of a .grg-file does not conform with the name given along with the `actions` keyword, an error is raised (which is just the right behaviour). However, the output file is genrated all the same, which should not happen.
- At test case `should_fail/ret_001.grg`: The signature of the rule demands a type `AB`. However, if you return a type `C` (that is no subtype of `AB`) no error is reported, which were the right behaviour.
